

### Get Offenders of the Street

- **Zero Tolerance Policing.** Restore law and order by acting against every reported crime. This means investigation and possible arrest. We will take back control of the street with **saturation stop and search** affecting up to 1 in 5 people [in high crime areas](#). Targeted curfews for under 18s in crime hotspots. [Mobile knife arches](#) to catch knife carriers.
- **Fast Track Arrest.** To arrest and charge a criminal now takes huge amounts of police time and resources. **We will open pop-up custody centres on high streets in crime hotspots** to ensure swift and certain justice for offenders and get police out on the beat again.
- **30,000 More Police Over a 5 Year Parliament.** Fast track recruitment of military veterans. Ensure more police are on the beat and use better technology. Scrap all Diversity, Equality and Inclusion roles and regulations to stop two-tier policing. De-politicise the College of Policing.

### Justice

- **Fast Track Courts.** 24/7 justice if necessary. No bail for serious violence or sexual offences. Recommission old court premises if necessary. Call for retired magistrates to return.
- **More Crime, More Time for Repeat Offenders.** 10% of criminals commit 50% [of all the crime](#). Stop the revolving door for criminals who commit multiple offences. More than 3 serious offences and you could end up with life imprisonment.
- **Commit the Crime, Pay the Price.** Prison with no early release and no suspended sentences for serious violent offences, sexual offenders and knife possession. End the £200 shoplifters' charter. All shoplifters face arrest. Mandatory life imprisonment for drug trafficking.

## Keep the Public Safe

- **12,400 New Prison Places on MoD Land in Under 18 Months.** We will end the [prison place shortage](#). During the covid crisis, NHS Nightingale hospitals were built in weeks with help from the British Armed Forces. **We would build 5 new Nightingale Prisons with the assistance of the Army. These would be low cost, high security, pre-fabricated modular structures of concrete and metal.** Prisons would be named after historical figures involved in policing reform, Ex. Sir Robert Peel.
- **10,400 [More Prison Places](#) by Transfer of Foreign Prisoners to Country of Origin.** Bilateral agreements will be made so foreign offenders finish their sentence in their own country. Already [accepted practice by the EU](#) and [UN](#). Denmark has an [agreement with Kosovo](#).
- **10,000 + Additional “Dynamic Prison” Places Overseas.** Serious offenders will serve their time overseas. We will acquire flexible, low cost prison capacity through rented prison cells in third party countries. **We would consider multiple partners including El Salvador.**

## Cut Costs

- **Cut the Cost of Prison by 20%.** Last year, a UK prison place was around [£51,800](#). **Almost the same as [school fees at Eton](#).** Annual [prison costs](#) in France are around [£40,000 per inmate](#). In some EU countries like Romania and Slovakia it is half of that.
